DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art US Patent No. 5,471,985 (herein referred to as Warden) discloses a MEG system with a SQUID dewar having a fixed headrest and a sensor array plate for detecting brain signals from a person. US Patent No. 5,152,288 (herein referred to as Hoenig) also discloses a SQUID dewar device. This device comprises a sensor arrangement and bearing means that are held so that the distance change and the gap occurring between the sensor arrangement and the bearing means are less than 100um. However none of these prior arts disclose a plurality of first and second rods that are composed of material expandable and contractible with changes in temperature connected to a movable mounting member and an array plate. The prior arts also do not disclose keeping the change in the spacing between the sensors and the headrest substantially constant by these expanding and contracting rods. The above prior arts do not render obviousness to include the novel subject matter stated above.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
